AND INNOVATION

**The Elements Are No Match
For The Barrier**

Special Features

Mounting Rail
mounts to parting stop
1/2" closer to house than
other storm windows.

Rubber Interlock
seals midsection between
glass panes and keeps
window from rotting.

Master Frame Corners
screwed together in all
4 corners with 2 screws
each - if house settles the
window will move with it.

Metal Corner Keys
(not plastic) will not break
off like plastic keys do.

Pre-Drilled Weep Holes
allow water and moisture to
drain from windows.

Metal Latches
(not plastic) will not break
like plastic latches do - also
has groove cut out of sash
for easier access.

All Lang Exterior products, hardware styles, and ratings are subject to change without notice.

Lang Exterior has been custom-making Storm Windows for over 60 years. They are built to the same quality standards as our vinyl replacement windows, so you are assured the tightest possible fit. Barrier's features are a culmination of knowledge, quality, durability, and practicality. Barrier provides energy efficiency – less projection from the house gives a smaller buffer zone leaving less air to be heated and wasted; and being fully weather stripped around the storm panels reduces air infiltration. The extruded aluminum frame and all metal parts make a stronger, sturdier window. One of Barrier's best features is the drop-in glazing. This allows the glass to be reglazed without disassembling the frame. Simply remove the spline, drop in the glass, then replace the spline. "The elements are no match for the Barrier." Keep the elements away from your prime windows with Barrier Storm Windows.

Windows By Lang

**Experience the Barrier Storm Window series in:
Triple Track, Picture Windows, Sliders, and 3-Lite
Sliders.**
