

barrier

the elements are no match for the barrier

barrier

the elements are no match for the barrier

Mounting Rail
mounts to parting stop
1/2" closer to house than
other storm windows

Rubber Interlock
seals midsection between
glass panes. The rubber also
keeps window from rotting.

Masterframe Corners
screwed together in all 4
corners with 2 screws each
- if house settles the window
will move with it.

Metal Corner Keys
(not plastic) will not break off
like plastic keys do.

**Pre-Drilled Weep
Holes**
allow water and moisture to
drain from windows.

Metal Latches
(not plastic) will not break
like plastic latches do, also
has groove cut out of sash for
easier access.

All Lang Exterior products, hardware styles, and ratings are subject to change without notice.

Lang Exterior has been custom-making Storm Windows for over 60 years. They are built to the same quality standards as our vinyl replacement windows, so you are assured the tightest possible fit. Barrier's features are a culmination of knowledge, quality, durability and practicality. Barrier provides energy efficiency – less projection from the house gives a smaller buffer zone leaving less air to be heated and wasted; and being fully weather stripped around the storm panels reduces air infiltration. The extruded aluminum frame and all metal parts make a stronger, sturdier window. One of Barrier's best features is the drop-in glazing. This allows the glass to be reglazed without disassembling the frame. Simply remove the spline, drop in the glass, then replace the spline. "The elements are no match for the Barrier." Keep the elements away from your prime windows with Barrier Storm Windows.

Windows By Lang

Experience the Barrier Storm Window series in:
Triple Track, Picture Windows, Sliders and 3-Lite Sliders.
